Building Tomorrow Today

PROJECT: Berryessa Branch Library Parking Lot Improvements

Description: This project will expand the existing parking lot at the new Berryessa Branch Library to include an additional 38 parking spaces. Construction includes the demolition of the old library to make room for the new parking area and will require the temporary closure of existing parking spaces in both the Colette Drive and Noble Avenue parking lots during construction.

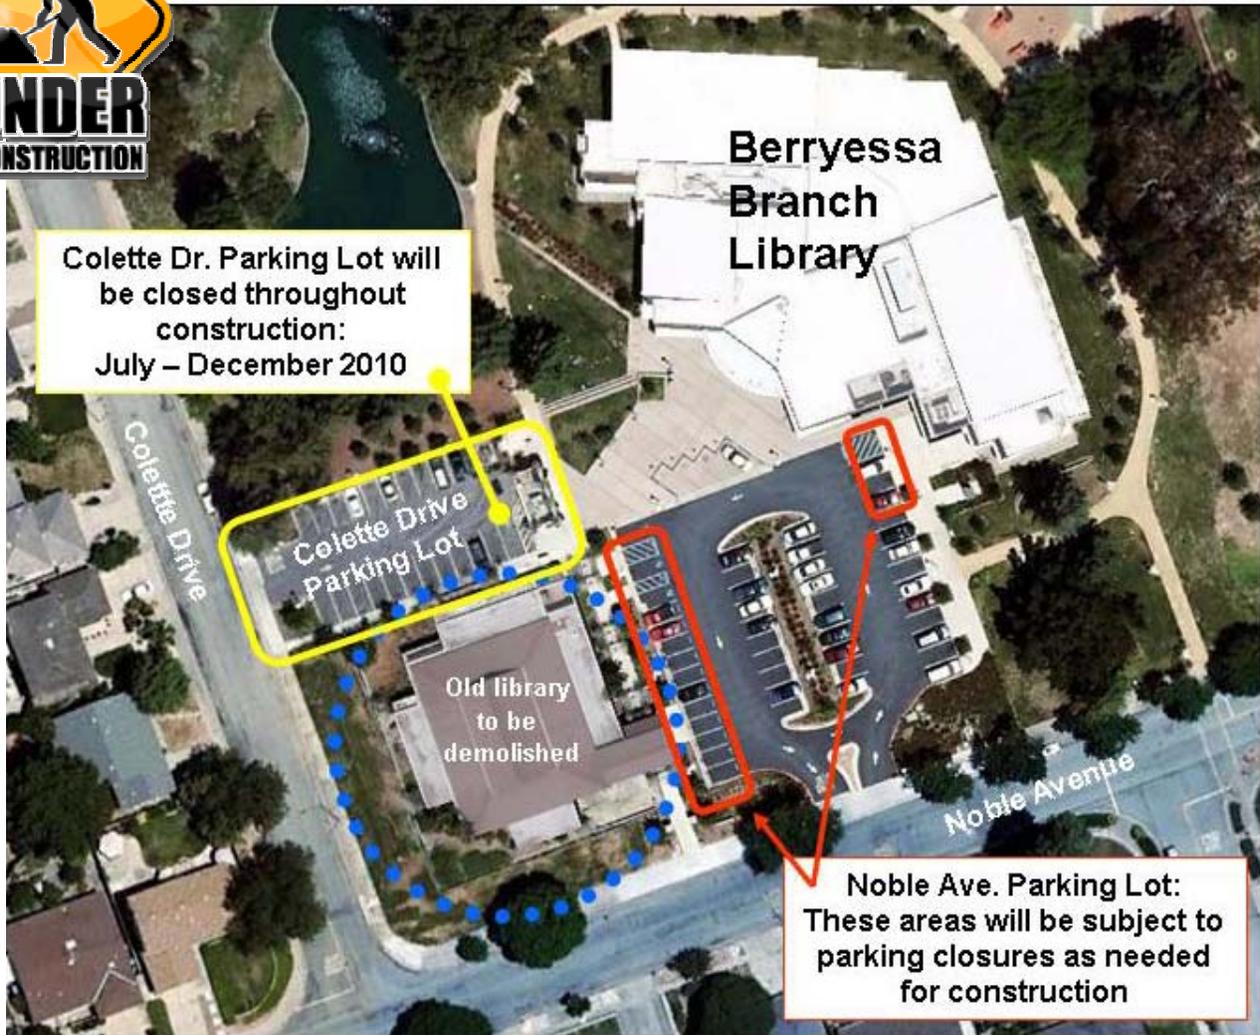

What: Schedule Update

Since the last update to the community, the project schedule experienced a delay when the construction bid received on this project was higher than the initial cost estimate. Additional funding for the project was approved by City Council on June 22, 2010 and construction will begin in early July, rather than mid June, as was previously projected.

Current Schedule:	Construction Start date**:	July 12, 2010
	Colette Dr. parking lot closed	July 12, 2010
	Noble Ave parking reduced	July 12, 2010
	Construction complete:	December 23, 2010

**Approximately 35 existing parking spaces will be closed initially to allow for demolition of the old library and construction of the expanded parking lot (see back of notice for detailed information).

Contact Information: Questions can be directed to Kathi Forman in the Department of Public Works by telephone at 408-535-8304 or by email at kathi.forman@sanjoseca.gov

Parking and Library Access During Construction

At the start of construction, the Colette Drive parking lot will be closed and approximately 14 parking spaces in the Noble Ave parking lot will be subject to closure as needed for construction. Entry into the Berryessa Branch Library will be from Noble Avenue with uninterrupted access during Library hours. The City’s contractor, PARC SERVICES, INC, is committed to keeping access available to drivers for drop-off and pick-up of visitors to the library and will make every effort to restore as many parking spaces as possible before school opens on August 23, 2010. The Colette Drive parking lot and new parking area will open in December 2010.
